

SOURCING OF FEATHERS

At UIMAGE, we make functional and timeless designs that last, we optimize storage and transportation costs with flat-packed designs, to make luxury accessible to you. The aim is to save the environment so that you can save on living.

In the sourcing of the feathers used in our Eos feather lamps we are repurposing a by-product from the food industry.

Goose feathers that would otherwise be burned are instead sanitized and repurposed thus diminishing the environmental impact. None of our goose feathers are derived from live or mistreated geese. UIMAGE is required by law and all major retailers around the world, to document the origin and proper handling of all geese and feathers.
